PORTFOLIO EXPOSURE BY MANAGER

As at July 2024

Source: State Street

*The Real Estate Composite benchmark consists of 50% S&P/ASX 300 A-REIT Accumulation Index & 50% FTSE EPRA/NAREIT Developed Index – Net Return (Unhedged in AUD), reflecting the portfolio's investment strategy.

INVESTMENT APPROACH

A multi-manager framework is utilised, where specialist investment managers are selected to form a diverse and complementary mix of investment strategies and styles. This can help reduce volatility by avoiding over exposure to a particular specialist investment manager. Derivatives may be used in managing the portfolio.

INVESTMENT STRATEGY

The strategy is biased towards utilising managers who are fundamental bottom-up stock pickers, have a repeatable investment process, operate within an appropriate risk management framework, and operate in an aligned and stable organisational structure. We believe these factors best deliver a stable outcome of returns within a multi-manager framework.

The Implemented Real Estate Portfolio uses two broad market managers that respectively invest across the entire market capitalisation spectrum of the domestic and global Real Estate Investment Trust (REIT) markets. That includes large, mid and small REITs by market capitalisation.

The portfolio managed by the domestic REIT manager will tend to be diversified in nature as it relates to the domestic benchmark and typically hold anywhere between 15-25 Australian REITs. The portfolio managed by the global REIT manager will typically be concentrated in nature as it relates to the global benchmark, holding anywhere between 30-50 global REITs. This allows for the Implemented Real Estate Portfolio to access the managers' high conviction stock picking decisions across what is a broader global REIT universe when compared to the domestic REIT universe.

The portfolio blends the above-mentioned managers, targeting managers who have a long term and consistent track record, are expected to continue to deliver on this track record, and whose investment styles complement each other well. Consistency of return profiles are of paramount importance such that we can comfortably blend managers who we believe will continue to complement each other well. The end result is the creation of a portfolio that aims to have an overall volatility below that of the composite benchmark.
