# About the portfolio

The Perpetual Direct Australian Equities Responsible Investment Portfolio is managed using Perpetual Private's time-tested investment philosophy – we seek to 'protect, then grow' clients' investments. The portfolio is built on the core principles of **quality, value** and **active management** combined with our three stage Responsible process outlined below:

#### 1. Ethical screen

We seek to invest in positive contributors to our world and therefore do not invest in companies that generate significant revenues<sup>(1)</sup> from the following activities. A company will breach our tolerance if its combined revenue from these activities is more than 5%<sup>(2)</sup>.

#### **Alcohol**

Production or sale of alcohol.

#### **Gambling**

Production of gambling equipment and games and the hosting or provision of gambling activities either online or on premises.

#### Tobacco<sup>(2)</sup>

Production or sale of tobacco, including e-cigarettes and other nicotine-based products.

#### **Nuclear power**

Production or use of nuclear materials for both energy and defense purposes, including the mining of uranium.

#### Armaments(2)

Production or sale of armaments regardless of intended purpose.

#### **Animal welfare**

Animal cruelty for cosmetic purposes.

#### **Pornography**

Production, sale, or distribution of pornographic materials.

#### **Fossil fuels**

Mining, refinement, production, and sale of fossil fuels including utilities that use fossil fuels.

# Predatory lending practices

Use of dishonest, unfair, or unethical lending practices.

- (1) The total gross amount of revenue generated from the sale of goods or services in the normal course of business operations.
- (2) For involvement in the production of tobacco, manufacture of nicotine alternatives and tobacco-based products and the development, production and maintenance of controversial weapons, a 0% revenue threshold is applied.

#### 2. ESG integration

Using a unique ESG model, we seek to identify companies that we believe are sustainable leaders within and across industries. Our proprietary model is dynamic, enabling us to get to heart of each company's performance against its key ESG opportunity set. We then aim to populate the portfolio with these industry and market leaders, creating a portfolio of high quality and responsible businesses.

**How it works**: The model utilises an array of data to score companies based on the ESG factors that are more material to their business. For instance, scores for banks emphasise Governance and Social factors, while mining companies are scored with a higher emphasis on Environmental factors. We use this scoring system as a core input into our portfolio construction process alongside our fundamental quality requirements.

#### **Environment**

Carbon emissions
Supply chain footprint

Water stress
Biodiversity and land
use

Waste management

#### **Social**

Modern slavery

Human capital welfare

Product and customer

safety

Workforce diversity

Community relations

Privacy and data security

#### Governance

Board

Pay

Alignment

Accounting

Business ethics and best practice

Tax transparency

#### **Impact**

Impact opportunities

The ESG factors we focus on have been carefully selected to reflect Perpetual Private's core values and the feedback we receive from our clients, ensuring alignment with both our ethical framework and investment objectives.

#### 3. Proactive engagement and reporting

We employ a strategic engagement approach focusing on issues critical to both financial performance and long-term sustainability. Our goal is to collaborate with companies to foster positive outcomes for all stakeholders. If challenges persist, we are prepared to take decisive actions, such as divesting, initiating shareholder proposals, or, where possible; exercising proxy voting to advocate for change. Transparency is paramount, and we commit to regular reporting on investment performance, engagement activities, company profiles, and updates during reporting seasons.

Our <u>Corporate Engagement Policy</u> and portfolio <u>Responsible Investing Scorecard</u> are available on the Direct Equities section of our website www.perpetual.com.au/managed-accounts.

## Portfolio suitability

The portfolio is designed for investors who are conscious of the social and ethical implications of where their money is invested, are less benchmark conscious and have a minimum investment timeframe of five years or longer.

#### **Risks**

All investments carry risk, for example market and economic risk where certain events may have a negative effect on the price of the stocks in the portfolio. These events may include changes in social or political conditions, as well as market sentiment, the causes of which may include changes in governments, wars, social unrest, pandemics and natural disasters. The impacts of such events can be highly unpredictable, which may give rise to increased or prolonged market volatility. Your financial adviser can assist you in understanding the full risk profile of the portfolio and whether the portfolio is suited to your financial needs.

## **Benefits of investing with Perpetual Private**

- **Purpose built for managed accounts** the portfolio has low turnover and is supported by tools and communications to provide investors with transparency on portfolio decisions and outcomes.
- Responsible Investment assurance all stocks selected must meet our quality selection criteria and satisfy our strict Responsible Investment criteria.
- Well credentialed, specialist investment team managing and monitoring the portfolio with a strong, established performance track record.
- **Trusted brand and process** our heritage of over 130 years and our origins as a trustee business contribute to our deep understanding of what it means to be a fiduciary of others' assets.

The Responsible Investment Certification Program provides general advice only and does not take into account any person's objectives, financial situation, or needs. Neither the Certification Symbol nor RIAA recommends to any person that any financial product is a suitable investment or that returns are guaranteed. Because of this, you should consider your own objectives, financial situation and needs and also consider the terms of any product disclosure document before making an investment decision. Certifications are current for 24 months and subject to change at any time.

\*The rating contained in this document is issued by SQM Research Pty Ltd ABN 93 122 592 036 AFSL 421913. SQM Research is an investment research firm that undertakes research on investment products exclusively for its wholesale clients, utilising a proprietary review and star rating system. The SQM Research star rating system is of a general nature and does not take into account the particular circumstances or needs of any specific person. The rating may be subject to change at any time. Only licensed financial advisers may use the SQM Research star rating system in determining whether an investment is appropriate to a person's particular circumstances or needs. You should read the product disclosure statement and consult a licensed financial adviser before making an investment decision in relation to this investment product. SQM Research receives a fee from the Fund Manager for the research and rating of the managed investment scheme.
