\*\*The total size of the Fund includes all unit classes of the Fund. This includes a retail class.

## MARKET COMMENTARY

Financial markets responded positively to the results of the US presidential election with equities rallying globally, led by the US. Bond markets retraced slightly after selling off in September and October on concerns around the inflationary effect of proposed US trade policies.

Domestic bond yields fell through November with the Australian 10-year government bond yield rallying 16 bps over the month down to 4.34%. The short end 2-5 years fell back below 4% by month end. Offshore yields were more volatile with US yield spiking following the election before retracing and French bond yields selling off sharply reflecting political uncertainty.

AUD spreads traded in a tight range during November. While spread contraction was broadly muted, the utilities sector was the notable outperformer. EUR and USD spreads rallied following the US election consolidating their strong recent performance. US High yield and investment grade spreads are at levels last seen prior to the GFC. Swap spreads were in negative territory throughout November, contracting during the first two weeks before returning to near 0 by month end.

No indications of end of year fatigue were present in the primary market with a busy pipeline of deals across financials, corporate and securitised sectors. Demand was robust throughout the month leading to oversubscribed book builds, most notably Woolworths 10-year \$800M which priced much tighter than guidance reflecting the market's appetite for long dated blue chip corporate paper. In the Financial space, NAB (7-year) and ANZ (5-year) each raised \$2.5B of senior debt across fixed and floating tranches. Kangaroo issuance was also healthy with a number of offshore borrowers coming to the Australian market to meet the persistent robust demand.

## PORTFOLIO COMMENTARY

The Fund's yield premium above bank bills was the key determinant of outperformance during November. The Portfolio's yield advantage remains centred around allocation to domestic banks and RMBS. The portfolio running yield at month end was 5.4%, with the average credit spread measured at 1.0%.

Credit spread dynamics were subdued as spreads traded in a tight range throughout the month. Domestic banks, insurers, Real Estate investment Trusts and securitised sectors all marginally contributed to relative return.

Sector and risk allocations were broadly maintained over the month. The Fund added exposure to CMBS and non-conforming RMBS while trimming prime RMBS. The Manager also elected to take part in a new senior unsecured domestic major bank deal.

The outlook for credit remained marginally negative through November. Risk management remains crucial in these conditions. The Fund is defensively positioned while retaining the capacity to take advantage of relative value opportunities where available.

## OUTLOOK

The credit outlook remained in marginally negative territory throughout November.

Valuation indicators are marginally negative. US high yield spreads are trading below the fair value range and AU swap spreads are very tight and were negative throughout the middle of the month. Elsewhere, a spike in opportunistic issuance is weighing on the outlook with borrowers exploiting strong demand, resulting in elevated issuance levels.

The growth outlook remains neutral. The ratio of upgrades to downgrades remains supportive however the macroeconomic growth indicators remain challenged.

Supply and demand indicators continue to weigh on the outlook. The high volume of recent issuance paired with a healthy pipeline and light maturity schedule conspire to negatively impact the outlook. In spite of these factors however, demand has remained very resilient thus far.

Technical indicators continued to improve, remaining in positive territory. Intermediary positioning remains positive with elevated cash levels expected to contribute to demand. US credit spreads, equity markets and equity market volatility indicators are all constructive.
